Universitas Pamulang: Current student; focus on web development, software engineering, information systems, and digital products.

TECH STACK

Frontend: React, TypeScript, Inertia.js, TailwindCSS, Vite
Backend: Laravel, REST API, Fortify, Node.js, Express
Database: MySQL, SQLite, Firebase
Visual/UI: Framer Motion, GSAP, Three.js, Recharts, Leaflet
Tools: Git, GitHub, Postman, Figma, VS Code, Pest

CORE SKILLS

- Web development full-stack
- React UI implementation
- Laravel backend & API
- Dashboard, CMS, admin flow
- Database modeling & validation
- Technical documentation
- Report writing & data recaps
- Team communication and service

LANGUAGES & WORK TRAITS

Indonesian: Native / active
English: Basic-intermediate; technical reading
Accurate, Disciplined, Fast learner, Problem solving, Clear reporting

TARGET ROLES

Full-Stack Developer, Laravel/React Developer, Frontend Engineer, Junior Web Developer, Product Engineer, IT Support with reporting/documentation focus.

WORKFLOW

Research: clarify goals, users, scope, and constraints.
Design: shape page structure, data, navigation, and responsive UI.
Build: implement React/Laravel, APIs, database, and validation.
Test: check main flows, bugs, performance, and visual consistency.
Report: prepare progress reports, issue notes, test results, and recommendations.
Iterate: refine details, documentation, and release readiness.

ATS KEYWORDS

Full-Stack Developer, Laravel, React, Inertia.js, TailwindCSS, REST API, MySQL, Dashboard, CMS, Documentation, Report Writing, Data Recap, Store Operations.

WORK EXPERIENCE

Universitas Pamulang | Web Development

- Developed academic/internal web needs, including page structure, responsive layouts, UI components, and user flows.
- Supported React/Laravel feature work, data integration, input validation, dashboards, CMS/admin flows, and user experience refinement.
- Prepared technical documentation, progress notes, testing results, and development reports so work could be tracked, reviewed, and continued.
- Coordinated requirements, shaped practical solutions, and kept implementation clean, readable, and maintainable.

PT Sumber Alfaria Trijaya Tbk | Store Crew

- Handled store operations: customer service, transactions, product arrangement, stock checks, product displays, and SOP execution.
- Prepared operational reports, daily recaps, simple data records, and activity documentation to support store administration.
- Built speed, accuracy, discipline, communication, data attention, and accountability in a team-based operational workflow.

SELECTED PROJECTS

SMANTEN Portal: Modern school website with CMS, alumni hub, gallery, alumni map, scroll animation, and 3D visuals for institutional presence.

LinguaPath: TOEFL ITP EdTech platform with 60-day learning path, simulation, progress dashboard, mistake journal, admin content, and analytics.

Solvara Studio: Digital studio landing page for web, mobile, network, server, CCTV, ISP-ready support, bilingual navigation, and consultation CTA.

Cidurian Riverside: Cafe/restaurant website with menu, gallery, online reservation, cart, order tracking, and WhatsApp CTA.

MajorMind: Major recommendation DSS using psychometrics, AHP-TOPSIS, Consistency Ratio, dashboards, and Explainable AI.

KAWA AI: Student violation monitoring platform across web/mobile/API, multi-role dashboard, HLS CCTV, JWT auth, and Swagger docs.

PROFESSIONAL VALUE

Combines web development capability with operational and reporting experience. Strong in documentation, data recaps, reports, requirement communication, and delivering features usable by real users.

REPORTS & DOCUMENTATION

- Prepared web development progress reports, change notes, feature testing results, and issue lists for technical evaluation.
- Created daily operational recaps, simple data records, and activity documentation to support store administration.
- Built concise, readable reports that can support review, follow-up, and decision-making.
- Turned workflow information into clear notes: requirements, progress, status, issues, solutions, and next actions.

VALUE OFFERED

- Able to support web, admin, dashboard, reporting, and documentation needs by understanding both technical and operational sides.
- Fits teams that need a junior developer who is organized, quick to learn, detail-aware, and clear in progress communication.
- Brings a mix of portfolio projects, campus web experience, and operational work experience that strengthens work discipline.
